5

The new Skimz Pyramid protein skimmer is slim and powerful. With space saving design, it is great for people who have small sumps, but in need of a powerful protein skimmer. The design of the new Skimz Pyramid skimmer has slimmed down the width by up to 36%.

Monzter Vs Pyramid (%)

- SN143 : SP183 - 36%
- SM163 : SP203 - 20%
- SM203 : SP253 - 23%
- SM253 : SP283 - 31%

The new R14 TinyAir™ bubble plate designs with the ratio 1:4 coarse-to-fine holes which further reduces the bubble sizes to get a finer sized bubble.

Bubble size is important as the smaller the bubble, the greater will be the surface area for attraction of the organic waste.

1. Geared water level adjustment system.
2. Powering the skimmer is a DC pinwheel motor.
3. Semi-pipeless design.

4. R14 TinyAir™ bubble plate to increase efficiency.
5. New rectangular silencer to reduce noise.
6. "Push-Fit" collection cup for easy removal.

One bubble that is 1mm diameter has a surface area of 3.14 mm², whereas half the bubble size with a diameter of 0.5mm for the same volume of air is now 6.28 mm², or double the surface area. Smaller bubbles have an added advantage, they rise slowly in the reactor chamber giving them more time to react.

Technical features:

- Pyramid shape
- R14 TinyAir™ bubble plate
- Footprint reduced by 36%
- Semi-pipeless design
- Geared adjustable system
- DC pinwheel pump with six preset RPMs and food shutoff timer

Skimz Pyramid protein skimmer has four different models.

Pyramid MSRP (SGD):

- SP183 - \$598
- SP203 - \$678
- SP253 - \$778
- SP283 - \$888
