

SKIMZ WAVEMAKER | SPECIFICATIONS

Model	Dimensions (mm)	Voltage	Pump (Watt)	Tank Thickness	Flow (L/h)	For Aquarium (Litre)
SS6.0	75 x 60 x 50mm	24V DC/1A	max. 18W	12mm (1/2")	6,000 (1585 gph)	up to 200L
SS9.0	90 x 70 x 60mm	24 DC/1.5A	max. 28W	15mm (9/16")	9,000 (2377 gph)	up to 300L
SS18.0	105 x 80 x 70mm	24 DC/2.75A	max. 40W	19mm (3/4")	18,000 (4755 gph)	up to 800L

SuperSilent Wavemaker

Skimz SuperSilent wavemaker pumps use high-quality 6-pole motors along with Sine-Wave DC technology which ensure efficiency and quiet operation. The controllers with "Wave Sync" function which allows you to combine up to six SuperSilent wavemakers, and create a wireless Master/Slave synchronise mode.

SuperSilent wavemaker has a small footprint and producing a high-performance pump for any aquarium. There are also one-touch 10 minute feeding mode, automatic self-cleaning system.

The onboard photo-sensor night mode, when enabled will automatically lower the pump speed when the lights go out.

The Skimz SuperSilent features:

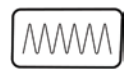

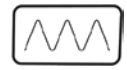

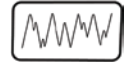

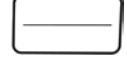

- Silent
- Small footprint
- Self-Cleaning
- Multiple Pre-Set flow modes
- Includes photo-sensor
- Strong magnetic mounting

1. Sine-Wave DC technology along with high-quality 6-pole motors.
2. Mounting bracket that can let the pump rotate 360°.
3. Large display and LED light indicators to show mode currently enabled.
4. Strong neodymium mounting magnet with rubber vibration isolators.

Skimz SuperSilent wavemaker includes a strong neodymium mounting magnetic system and allows you to rotate 360°. With rubber vibration isolators between the pump and magnet to keep pump silent.

SuperSilent wavemaker pump has 6 different flow modes. You can change the flow strength and choose different flow modes.

- Short Pulse 
- Long Pulse 
- Tidal Wave 
- Oceanic Current 
- Constant Flow 
- Alternate Flow
